

PUBLIC NOTICE: Consideration of Pulaski Solar Proposal to Begin Shortly

The Pulaski County Board will soon begin consideration of a proposed Pulaski Solar 405-MW utility-scale solar power plant whose construction and operations will unlock tremendous fiscal and economic benefits for the region:

- » \$650+ Million private investment in Pulaski County
- » Construction supports 1,300+ jobs & \$117 million in earnings for in-state workers
- » Pulaski Solar will increase the total assessed value of all properties in Pulaski County by 75% in first year of operations
- » The facility is projected to pay \$57 million in property taxes over the next 25 years
- » Acreage will be returned to agricultural conditions upon decommissioning and removal of power plant infrastructure
- » Proposal is supported by local landowners who are participating in project

CULBL10018U-IL

OPEN HOUSE: Monday, March 18 from 4:30 PM - 7 PM
Shawnee Community College

PUBLIC NOTICE:

Community Open House Regarding Pulaski Solar Proposal

On behalf of Pulaski Solar, LLC and Vistra Corp., the proposed developer and operator of a 405-megawatt solar power plant, neighbors from Pulaski County are invited to attend an open house and learn more about the energy center. The company has submitted a detailed application, which is under review by the County and third-party experts.

After the Pulaski County Board completes its analysis, they are expected to formally consider the project later this spring. While the County does not have a Zoning Ordinance, and the project has the support of participating landowners, the County is reviewing how the development will comply with state and local standards.

WHEN:

Monday

March 18, 2024

4:30 – 7 p.m.

Background: Pulaski Solar is a once-in-a-generation opportunity to drive a \$650 million investment in the county to build a solar power plant. The facility's construction is estimated to create numerous economic benefits including supporting 1,300 in-state jobs and generate over \$117 million for workers. The project will increase the total assessed value of all properties in Pulaski County by 75% in first year of operations. Approval of the proposed plant will unlock \$57 million in new property taxes that can support local public services, assist in infrastructure investments or reduce the tax burden of other county property owners.

WHERE:

Shawnee Community College Atrium

8364 Shawnee College Road

Ullin, IL 62992

While in operation, the acreage used by the solar power plant will be in passive conservation. Pre-existing contractual agreements with landowners and the State of Illinois require the project to be responsibly decommissioned and the land to be returned to its prior condition upon the power plant's retirement.

Open House format and no reservation is required.

WE HOPE TO SEE YOU THERE!
